DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed. The following is an examiner's statement of reasons for allowance:

The examiner agrees with applicant's remarks, which detail how the amended claims overcome the previous Office Action. Specifically, the prior art to Fox and Francis are not capable of performing the claimed rotation. Furthermore, the remaining prior art does not disclose the amended limitations as follows:

Poole (U.S. Patent 435,708) discloses (figs.1-3) the claim 1 anti-scaling device comprising a hollow central body portion (1) mounted on a bar (4) for rotation around a transverse axis (central axis of 4), the bar passing through the hollow central body portion along the transverse axis, several spigots or poles (3) extending outwardly from the body portion in different directions and spike units (7). The prior art does not disclose or suggest that the spike units are each mounted on a said spigot or pole for rotation around axis non-congruent with the transverse axis. Claim 11 is similarly not disclosed or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
